

RDC Concrete

We Promise

We Deliver

RDC BagCrete

RDC Bagcrete is a unique solution, whose reach can extended to locations,

where a conventional transit mixer cannot reach or where viability of site mix is an issue due to space or some other constraints. RDC Bagcrete is concrete supplied in 40 kg bags in both dry as well as wet form which can be transported and directly used for casting any structure.

Applications

- Locations not accessible by transit mixers such as congested lanes, remote locations
- For relatively small concreting jobs
- Ideal for concreting during no entry in cities
- For casting of column starters
- For repair and renovation works

Advantages

Dry concrete in a handy packing, grade ranging from M10 to M80

Reduced labor cost

Zero wastage

Easy access to any location

Robust workable mixes certified by RDC Concrete

Easy to handle and store up to 3-4 months

Packed in 40kg bag for easy handling and shifting

Technical Properties

Strength Class	M10 to M80
Slump (mm)	100-150
Segregation resistance	High
Slump retention	Up to 4 hours
Curing Required	Yes

While using in dry form, add water as per the instructions given on bag

Store Bags in a cool and dry place

Concrete must be placed within stipulated design period
