

RDC Concrete

We Promise

We Deliver

RDC ExpressCrete

 **RDC Expresscrete** is a solution especially designed to achieve high early

strength than conventional concrete in order to achieve faster rate of construction. This helps in save time and reduces the project cost. High early strength and workability are achieved by using high performance additives, super plasticizers and accelerators in addition to advanced mix design methods.

Applications

- Post Tension and flat slabs
- Projects with fast turn around times
- Concrete pavements
- Precast segments
- Prestressed concrete

Advantages

Reduces project duration, saves time and cost

Early deshuttering of form work to achieve faster rate of construction

Can be used for used all types of structure due to high workability

Early opening of roads within 24 hours

Beneficial in achieving required early compressive strength in cold weather conditions

Technical Properties

Strength Class

Customizable as per requirement

Workability

Flowable

Segregation Resistance

High

Concrete must be placed within stipulated design period

Special Instructions

If you have requirement of ready-mix-concrete, please contact on sales@rdconcrete.com or call 8291891155.
