

RDC Concrete

We Promise

We Deliver

RDC FasttrackCrete

RDC Fasttrackcrete

is a special solution for cement concrete road which

attains strength at a very high rate and helps in opening the road to traffic within 24 hours of the application. It is a single integrated novel solution which comprises cement and special additives, modified polymers, mineral & chemical admixtures that helps in quickly achieving desired properties of concrete in production under strict control and formulation; deliver in a controlled manner and craftsmanship on placing, finishing, curing by specialists and experienced personnel.

Applications

- City roads & junctions which cannot be closed for long
- Roads repair work
- Industrial floors
- Air pavement repair work
- Bridge Deck wearing coat
- Loading docks and ports

Advantages

Traffic can be resumed within 24 hours of repair

Reduces maintenance cost

High compressive strength with low water permeability

Self flowing, easy to place and finish

Technical Properties

Ultimate Strength of pavement

Up to 75 Mpa

Strength at 24 hours

Up to 25 Mpa

Flow

500 mm

Segregation resistance

Very High

Concrete must be placed within stipulated design period
