

# RDC Concrete

We Promise

We Deliver

# RDC GreenCrete

**RDC Greencrete** is designed while keeping sustainability and environment

*protection at heart. RDC Greencrete has very low carbon footprint as compared to the conventional concrete. RDC Greencrete has positive impact on environment in two ways. First, by use of more supplementary materials there is need of lesser quarrying for limestone. Secondly, it reduces the carbon footprint of the projects by a huge amount and paves path for sustainability.*

## Applications

- Raft foundations and footings
- For all RCC applications
- In areas where concrete is in contact with aggressive environment like chloride and sulphates

## Advantages

*Reduces carbon footprint of the project*

*Decrease dependency on cement*

*Points for Green Building Certification*

*Reduced heat of hydration*

*Increased durability of the structure*

*Better strength gain after 28 days*

### Technical Properties

Strength Class	Up to M50
Workability	Available in slump and flow
Segregation resistance	High

*Concrete must be placed within stipulated design period*

### Special Instructions

If you have requirement of ready-mix-concrete, please contact on [sales@rdcconcrete.com](mailto:sales@rdcconcrete.com) or call 8291891155.
